June 22, 2006

Laser Safety Officer Workshop
Brookhaven, NY, United States
July 11, 2006 through July 13, 2006

Disclaimer

This document was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor the University of California nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or the University of California. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or the University of California, and shall not be used for advertising or product endorsement purposes.

This work was performed under the auspices of the U.S. Department of Energy by the University of California, Lawrence Livermore National Laboratory under Contract No. W-7405-Eng-48.

Task Identification Process (TIP) List
Services or Installation of Goods

Subcontract Title _____

Subcontracting Firm _____ Subcontract No. _____

Subcontractors and vendors providing services, including the installation of purchased goods, are required to complete a TIP List. This list does not include every Environment, Safety, and Health (ES&H) related concern at LLNL. It is intended to highlight major concerns common to most on-site service activities.

Fire Protection

Will the job involve welding, soldering, or torch cutting? Yes No N/A
Will flammable/combustible liquids be used or stored? Yes No N/A
Will temporary heating devices be used? Yes No N/A
Will water and/or fire extinguishers be provided on the job site? Yes No N/A

(Examples include any work involving solvents, fuels, soldering, torch cutting, or heating devices; e.g., gasoline and diesel fuel delivery services, high-voltage cable splicing services, elevator repair services, flooring services, cafeteria hood cleaning and fire suppression service, and water pipe repair services.)

Electrical Safety

Will lock-out, tag-out be required? Yes No N/A
Will work be performed on or near energized equipment, lines, or circuits? Yes No N/A

Note: If yes, no work may be performed until reviewed and approved by LLNL/Hazards Control.

If yes, describe:

(Examples of this work include industrial shredder maintenance, power machinery repair services, elevator repair, overhead bridge crane maintenance/repair services, cathodic protection services, hydraulic test systems repair/service, and air compressor rebuilding services.)

Overhead Power Lines and Hidden Utilities

Will hazards associated with overhead power lines (e.g., clearance) be an issue? Yes No N/A
Will potential underground or hidden utilities need to be located on the job site? Yes No N/A

If yes, how will this be accomplished and who will perform the work (e.g., LLNL, subcontractor, other)?

(Examples of this work include tree pruning services, tree removal/relocation/replacement, underground utility identification services, concrete sawing and removal services, drill rig operations [e.g., soil characterization services, water well drilling, geotechnical investigation], and wall drilling.)

Electrical Power Transmission and Distribution

Will there be repair or maintenance of transmission and distribution lines and equipment? Yes No N/A

What methods will the subcontractor use to prevent accidental contact with energized lines or equipment?

Will workers be using nonconductive tools? Yes No N/A

(Examples of this work include high-voltage cable splicing services, telecommunications upgrade services, and elevator repair services.)

Powder-Actuated Tools

Will powder-actuated tools be used? Yes No N/A
Are operators trained and qualified? Yes No N/A

(Examples of this work include awning/canopy installation, tent installation, and furniture/fixture installation.)

Fall Protection

Will workers be exposed to a potential fall in excess of 6 feet? Yes No N/A

If yes, describe how workers will be protected:

(Examples of this work include tree pruning, window and ledge cleaning, window replacement, high-voltage cable splicing services, overhead bridge crane maintenance/repair services, roll-up door replacement, tent installation, awning/canopy installation, overhead air exchange installation, construction inspection and testing services.)

Scaffolding and Ladders

Will scaffolding or ladders be used and approved worker access be provided? Yes No N/A
Will scaffolding or ladders be exposed to wet and/or slippery conditions? Yes No N/A
Will scaffolding or ladders need to be secured to the building? Yes No N/A
Does the subcontractor have a designated supervisor for the work? Yes No N/A

(Examples of this work include window cleaning, tree pruning, window replacement, roll-up door replacement, tent installation, and awning/canopy installation.)

Demolition and Salvage

Does the subcontractor have a demolition/salvage plan? Yes No N/A

How will passersby be protected from potential hazards?

How will materials be lowered?

Have the demolition materials been evaluated for reuse or recycling?

Cranes, Forklifts, and Manlifts

Will crane(s), forklift(s), manlift(s), or other lifting equipment be used? Yes No N/A
Has lifting and rigging equipment been inspected and certified as required? Yes No N/A
Does the subcontractor have a designated competent operator? Yes No N/A
Will lifting attachments be used in conjunction with forklifts that are approved for use by the forklift manufacturer? Yes No N/A

(Examples of this work include heavy or oversized goods delivery, tree pruning, overhead bridge crane maintenance/repair, high-voltage cable splicing, and roll-up door replacement.)

Motor Vehicles and Heavy Equipment

Will the subcontractor be using motor vehicles or heavy equipment on-site? Yes No N/A
Will all operators have valid state driver's licenses? Yes No N/A
Will vehicles, including safety features (e.g., rollover protection), be inspected? Yes No N/A

(Examples of this work include delivery of goods, personnel transportation services, trailer relocation services, oil/water pump out and recycling services, asphalt grinding and asphalt sealing services, portable toilet services, weed/brush abatement and mowing services, landscape hydroseed services, drill rig operations [e.g., soil characterization services, water well drilling], tree stump grinding, concrete sawing and removal, and scrap iron removal services.)

Ergonomics

Will potential ergonomic injuries be controlled? Yes No N/A

Confined Spaces

Will work be performed in vaults, manholes, trenches, or tanks more than 4 feet deep? Yes No N/A

If yes, describe:

Does the subcontractor have a written confined space work program? Yes No N/A

Will work involving welding, torch cutting, brazing, grit blasting, or any machinery use be performed in or near confined spaces? Yes No N/A

Will painting, application of other coatings, or use of chemicals, solvents, combustibles, or similar hazardous materials be performed in confined spaces? Yes No N/A

(Examples of this work are many and varied; any service that could involve working in vaults, pits, tanks, etc.; e.g., cathodic protection services, high-voltage cable splicing services, telecommunications upgrades, construction inspection and testing services, water/fuel storage tank clean-out services, and utility corrosion inspection services.)

Respiratory Protection

Will the job involve materials or processes requiring respiratory protection? Yes No N/A

Does the subcontractor have a written respiratory protection program? Yes No N/A

(See sections on Confined Spaces, Chemicals, Asbestos, Lead, and Silica Dust [OSHA considers dust masks respirators].)

Personal Protective Equipment

Will the subcontractor provide workers with appropriate personal protective clothing and equipment (e.g., leather gloves, hardhats, eye protection, face protection, safety shoes, hearing protection, chemical gloves/clothing)? Yes No N/A

If yes, describe:

Does the subcontractor have a written Personal Protective Equipment program? Yes No N/A

(Examples of this work include most industrial-type services/installations.)

Asbestos-containing Materials

Is there a possibility that asbestos containing materials (ACM) will be encountered? Yes No N/A

If yes, describe:

Does the subcontractor have an asbestos work program? Yes No N/A

Has a 10-day notification to the Bay Area Air Quality Management District (BAAQMD) been submitted for renovations involving ACM greater than or equal to 100 linear feet, 100 square feet, or 35 cubic feet prior to renovation? Yes No N/A

(Examples of this work include disturbance or penetrations of flooring, walls, ceiling tiles, pipe lagging, transite siding, particularly in older facilities; e.g., furniture/fixture installation, carpeting/flooring services, and boiler repair/tune-up services)

Lead-containing Materials

Is there a possibility that lead-containing materials will be encountered? Yes No N/A

If yes, describe:

Does the subcontractor have a lead work program? Yes No N/A

(Examples of this work include disturbance of lead-based paint, particularly in older facilities. Lead is also present in certain electrical circuitry and metal alloys; .e.g, overhead bridge crane maintenance/repair, high-voltage cable splicing services, boiler repair/tune-up services, fixture installation services, and chiller maintenance/repair services.)

Chemicals, Solvents, Fumes, Vapors, and Dusts

(OSHA PELs and ACGIH TLVs apply)

Will work involve chemicals, solvents, painting, welding, torch cutting, brazing or grit blasting? Yes No N/A

If yes, describe:

Will MSDSs be submitted for all potentially hazardous chemicals and solvents? Yes No N/A

Will emergency eyewashes and showers be available to employees as necessary? Yes No N/A

Will ventilation requirements be reviewed to preclude exposure to employees? Yes No N/A

Are all paints in compliance with Bay Area Air Quality Management District (BAAQMD) limits on volatile organic compound (VOC) content? Yes No N/A

Will an LLNL environmental analyst evaluate all grit blasting waste before disposal? Yes No N/A

(Examples of this work include operations involving cleaning solvents, adhesives, paints, binders; e.g., solvent recycling services, oil pumpout and recycling services, diesel fuel filtration services, emergency hazardous waste removal/decontamination services, storage tank clean-out services, countertop installation (epoxies), portable toilet services, and flooring.)

Silica Dust

Will work involve jackhammering, rotohammering, drilling, grinding or other disturbance of concrete that might create silica dust? Yes No N/A

(Examples of this work include installations, pavement/concrete grading and paving, concrete sawing and removal services.)

Noise

Will employees be exposed to high noise levels on this job? Yes No N/A

Does the subcontractor have a written hearing conservation program? Yes No N/A

(Examples of this work include installations and heavy equipment operation.)

Heat Stress

If heat stress is an issue, will heat stress monitoring be routinely performed in accordance with the ACGIH TLVs? Yes No N/A

If yes, describe:

Will a rest area be provided in a cooler environment (e.g., utilizing shade, fans, air conditioning, etc.)? Yes No N/A

Will the subcontractor provide liquid replenishment at the job site? Yes No N/A

Will a work/rest regimen be enforced? Yes No N/A

Has training on recognizing the signs and symptoms of heat stress and heat stroke been provided to workers and supervisors? Yes No N/A

Radiation and Laser Safety

Will radioactive material/sources be used on-site? Yes No N/A

If yes, describe:

Will radiation-producing equipment be used on-site? Yes No N/A

If yes, describe:

Will special radiation dosimetry be required (other than normal LLNL-issued dosimeters)? Yes No N/A

Will an LLNL Radiation Work Permit for Visitors be required? Yes No N/A

Will the use of alignment lasers be necessary to perform work? Yes No N/A

(Examples of this work include radiography services and equipment/surface alignment services.)

Environmental Compliance

Will a 10-day notification to the Bay Area Air Quality Management District (BAAQMD) be required? Yes No N/A

Will all gasoline- or diesel-powered portable electrical generators be rated below 50 horsepower? Yes No N/A

Will all excess equipment and debris waste be evaluated by an LLNL environmental analyst to determine proper disposal? Yes No N/A

Will adequate measures be taken to prevent discharge of hazardous and regulated materials to the environment? Yes No N/A

Will equipment and vehicles be inspected daily for leaks of fuel, engine coolant, and hydraulic fluid? Yes No N/A

Storm Water Pollution Prevention Plan (SWPPP)

Will all work be performed in compliance with the LLNL SWPPP? Yes No N/A

Will a project-specific SWPPP be submitted to the LLNL ES&H Team for review? Yes No N/A

Will all concrete mixing, concrete cutting, and equipment-rinsing wastewaters be discharged to a low area or into a constructed basin for dewatering? Yes No N/A

(Examples of this work include concrete sawing and removal and hosing down equipment/work surfaces during clean-up.)

Additional Concerns

Does the subcontractor recognize any other potential ES&H concerns that could be associated with this work? Yes No N/A

If yes, describe:

Describe mitigation measures:
